SEA5000-1 Integrated Master Schedule Case Study

Presented by: Dr Ceilidh Armer

Date: 17 August 2022

Place: PGCS 2022

BAE SYSTEMS

Outline

- SEA5000-1 HCFP brief
- Where we were
- Why an integration process was required
- Where we are now
- Limitations and considerations
- Enhancements and positives

SEA5000-1 Hunter Class Frigate Program

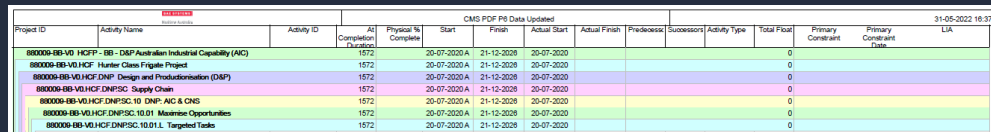

- Largest shipbuilding program in Australia
- Nine Hunter Class Frigates
- BAE Systems Maritime Australia (BAESMA) as Prime Contractor
- Sovereign engineering design capability
- Continuous Naval Shipbuilding and Australian Industry Capability

The Situation

- Hunter Class Frigate (HCF) Program Integrated Master Schedule (IMS) contains BAESMA's Contract Master Schedule (CMS) and the Commonwealth of Australia's (CoA) schedules
- BAESMA's CMS is in P6 and CoA's schedules are in OPP
- Schedule data integration issues

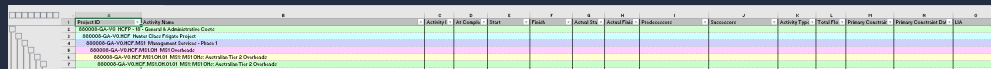

Where We Were

- Month-end schedule data contained 2 files
- PDF file

| Project ID | Activity Name | Activity ID | AS Completion % | Physical % Complete | Start | Finish | Actual Start | Actual Finish | Predecessor | Successor | Activity Type | Total Fiscal | Primary Constraint | Primary Constraint Date | LIA |
|---|---------------|-------------|-----------------|---------------------|--------------|------------|--------------|---------------|-------------|-----------|---------------|--------------|--------------------|-------------------------|-----|
| 880000-BB-V0-HCFP-BB-D&P Australian Industrial Capability (AIC) | | 1572 | | | 20-07-2020 A | 21-12-2028 | | 20-07-2020 | | | | 0 | | | |

- Some 'CMS Tool' limitations

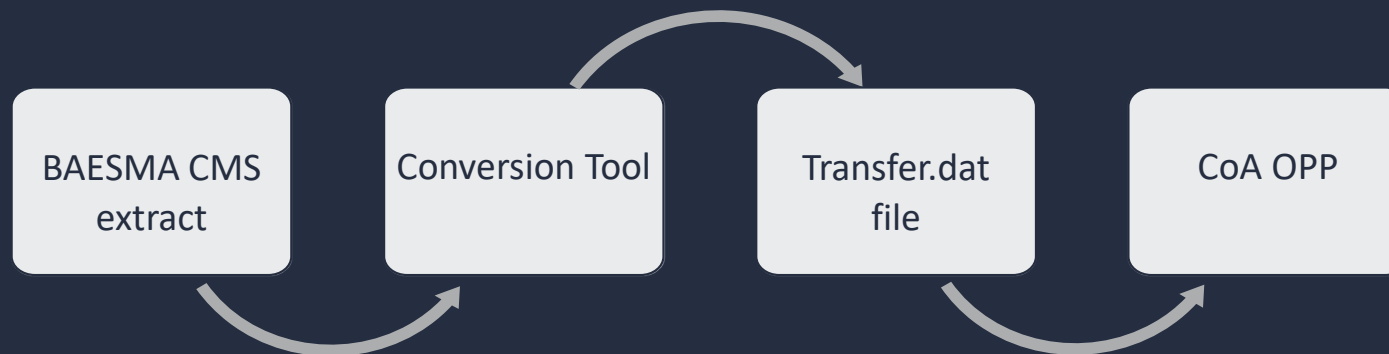

The IMS Structure

- IMS contains over 20 BAESMA schedules and 8 CoA schedules
- Uni-directional links from CMS to other IMS child schedules

The Integration Process

- High-level view of Integration Process

- Initial setup: Calendar File
- Code: WBS Code 01

The Integration Process

- Files received monthly from BAESMA
- Activity Data Export
 - 37 Attributes with Validated Calendar, C1 WBS ID and spare UIDs
- Logic Data Export
 - P6 Project and Activity IDs for Predecessors and Successors, Logic Type, Lag Value
- WBS Code Export
 - Code ID, Code Description and a check code line for WBS parents

| Activity Table | |
|--------------------------------|-------------------------|
| P6 Data Dump Field | Names |
| | Project ID |
| | Activity ID |
| | Activity Name |
| | Planned Duration |
| | Actual Start |
| | Actual Finish |
| | Activity Type |
| | Primary Constraint |
| | Primary Constraint Date |
| o Equivalent P6 Activity Field | |
| o Equivalent P6 Activity Field | Calendar |
| | Physical % Complete |
| | Expected Finish |

| Logic Table | |
|--------------------|--------------------------|
| P6 Data Dump Field | |
| | Predecessor Project |
| | Activity ID |
| | Successor Project |
| | Activity ID |
| | Relationship Type |
| | Lag |
| | Relationship Total Float |

| WBS | |
|-----------------|----------|
| P6 Nomenclature | |
| | WBS Code |
| | WBS Name |

The Integration Process

- The Conversion Tool - Tabs

The Integration Process

- The Conversion Tool – 3 coloured sections

Contains formulas which convert the data to imported into OPP

Contains raw data copied from P6 export

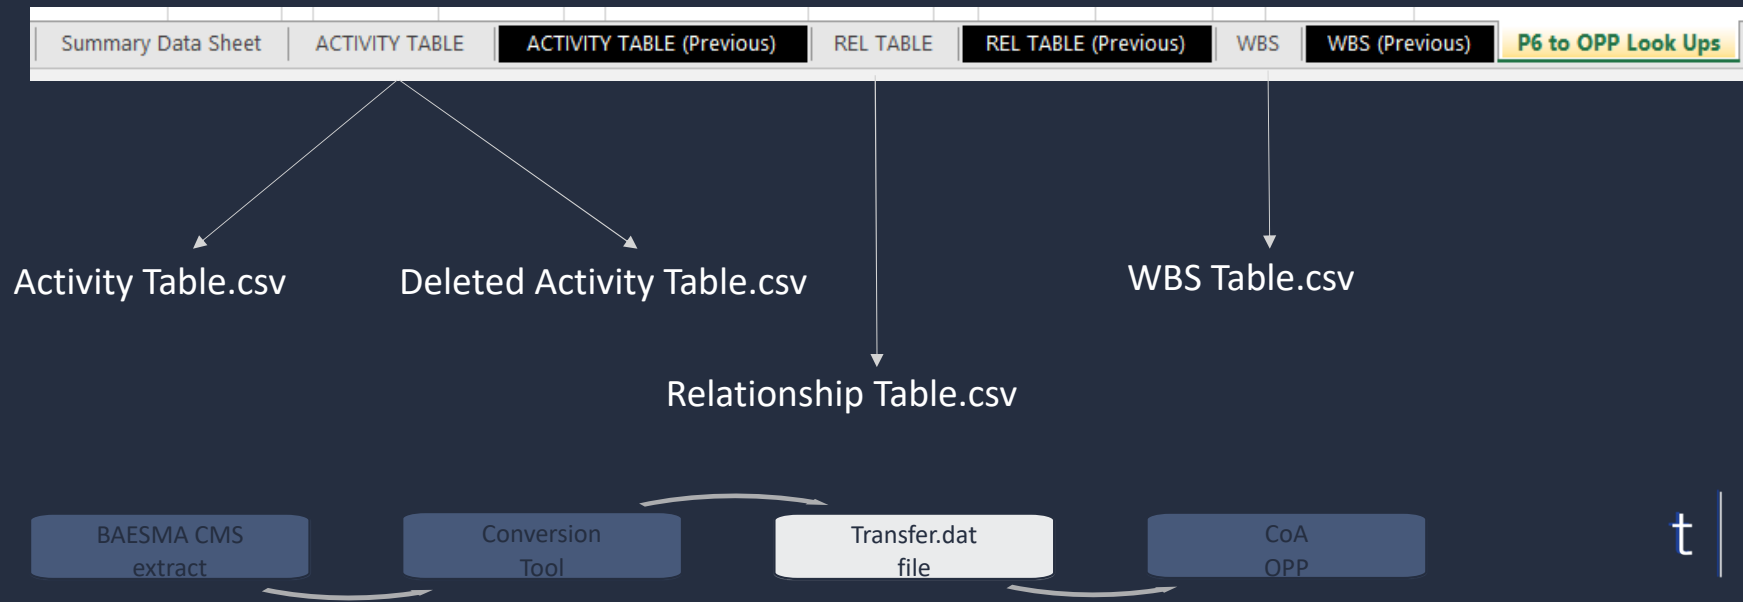

Contain formulas which compute checks on the raw data

The Integration Process

- Create the CSV files:

The Integration Process

- Import the CSV files in this order:
 - Deleted Activities Table
 - WBS Table
 - Activity Table
 - Relationship Table

Limitations of Integration Process

- No multi-directional links between CoA schedules and BAESMA's CMS within the IMS
- Resource information and Baselines excluded from integration process
- P6 Suspend and Resume feature
- Capability issues:
 - Impacts of Out of Sequence logic
 - As Late As Possible (ALAP) vs As Soon As Possible (ASAP) Activity Types
 - Constraints

Further Improvements

- Exploration of OPP's Import Wizard capability now that CoA have rolled out v8.4
- Resource loading of the Commonwealth's IMS

Enhanced Schedule Capability

- Integration process ensures CoA can view schedule in CASG sanctioned schedule software
- Dependency management
- Open dialog within BAESMA's internal leadership, and between BAESMA and CoA
- Improved working relationship between BAESMA PMO and CoA Schedule Team
- CoA can fulfil assurance role

Conclusion

- SEA5000-1 HCFP brief
- Where We Were
- Why an Integration Process was required
- Where We Are Now
- Limitations and considerations
- Enhancements and Positives
