Governance Purpose

The APS still places the weight of program and risk management on templates, tools and processes, rather than instilling a **culture of judgement, initiative and capability**. Risks often manifest because the desire to 'do something' results in 'solutioneering': governments announce a solution before properly scoping the problem, and then try to retrofit the appropriate risk, **governance and oversight** requirements.

Good Governance

- Critical to project success
- Provides the environment and guidance for a culture of success
- Presents a clear structure, defined roles and responsibilities, and levels of authority to support decision making
- Strong indicator of high levels of organisational project management maturity and capability
- Reflects an organisation that sees project management as more than technical tasks carried out by project managers

Project Governance and Control

- Governance provides the leadership and direction for a Project – it links the project outcomes with the organisation strategy and assures the relevance of the project
- Governance and control go hand in hand, and are a two way conversation
- Governance leads and sets the context or framework for Control
- You can't have good governance without the right information provided in a timely manner by effective project controls

Good Governance in OPM Context

- Governance is required at organisational, portfolio, program and project management levels
- Portfolio governance makes decisions about organisations investments and priorities, and strategic alignment
- Program governance is focussed resourcing and funding support, policy and oversight and compliance function
- Project governance is a leadership, oversight and compliance function

The Importance of Tailoring

- There is no one-size-fits-all approach to project governance. The particular approach to both should reflect:
 - The level of organisational project management maturity
 - The level of project practitioner capability and competency
 - The complexity of your projects
 - The duration of your projects
 - The size/value of your projects
- Appropriately applied, tailored, professional project governance and controls contribute to successful projects, programs and portfolios.

A Few Words About Benefits

“There is no logic in delivering a great project if it is not the right project for the organisation.

There is even less logic in delivering one that will fail at its intended outcomes.”

Chris Lawler, PfMP, Manager - Project Portfolio Office, Mater Health Services
PMI's Pulse of the Profession® In-Depth Report | 2016
The Strategic Impact of Projects

Knowing when to stop – or press ahead

Project Management Institute (PMI)

- World's leading not-for-profit professional membership association for the project, program and portfolio management profession
- Founded in 1969, PMI now delivers value for approximately 500,000 members, 700,000 credential holders and 3 million professionals working in nearly every country in the world through global advocacy, collaboration, education and research.
- PMI advances careers, improves organizational success and further matures the profession of project management through its globally recognized standards, certifications, resources, tools academic research, publications, professional development courses, and networking opportunities.

PMI Pulse of the Profession

“When a project and program management mindset is embedded into an organization’s DNA, performance improves and competitive advantage accelerates.

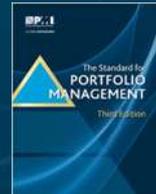

PMI’s research shows that indicators of high performing organisations are:

- formal approaches to program and project management, including governance and control
- engaged executive sponsors, standardized approaches and certified professionals
- adopting proven best practices and standards
